

Discover the Wonders of God's Creation!

From backyard ecosystems to extreme climates and the amazing workings of our bodies, students explore how everything in **God's creation is connected**. Hands-on activities, experiments, and vivid illustrations make **science engaging, memorable, and inspiring**—helping every student see the beauty, wisdom, and design in the world around them,

Course Units Include:

1. Ecosystems

- Explore the variety of life just outside your door
- See how animals, plants, and humans interact
- Keep God's creation in balance

2. Weather & Water

- Learn how weather shapes our world
- Study climate, seasons, and the water cycle
- Observe clouds, rain, snow, storms & more

3. The Human Body

- Understand how our bodies work from the inside out.
- Explore digestion, circulation & breathing
- Celebrate the gift of our bodies

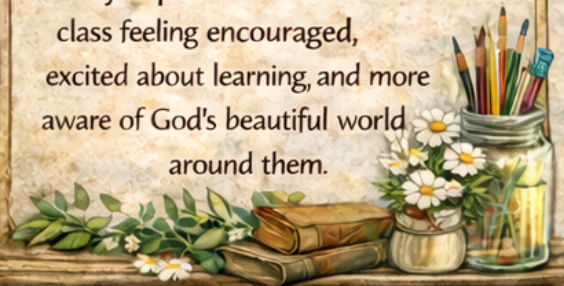

Meet the Tutor

Hi there! I'm Stacey Rhoades Huizar, but you can call me Mrs. Stacey.

As a homeschool mom, I love creating a warm, welcoming space where children feel comfortable learning, asking questions, and being curious.

In our K–2nd unit study, we'll explore ecosystems, weather, and the human body in a gentle, hands-on way.

My hope is that children leave class feeling encouraged, excited about learning, and more aware of God's beautiful world around them.

Tuition & Fees

- **Total Tuition: \$350**
- **Payment Plan Available**
 - \$175 due at registration
 - \$175 due second semester
- **LAMP Families: \$350**
Self-pay required if dropping after second class
- **Material Fee: \$60**
(non-refundable—workbook hands-on experiments, activities)
