October 22, 2021.

LAMP students are required to self-pay for any missed LAMP
payments due to a student dropping after the 3rd class or not
meeting LAMP requirements during the semester.

Meet the tutor:

Hi My name is Jaime Rogers. I'm a homeschool mom to four amazing girls whom I've had the privilege of homeschooling for the past 6 years. I'm married to my best friend of 21 years. When I'm not doing laundry or homeschooling I love hanging out with family, listening to worship music, drinking coffee and watching movies.

My husband and I made a choice a few years ago to move from a residential neighborhood to the country. Since then I have found that being surrounded by God's amazing creation has led our homeschooling to be more adventurous and exploratory. We've used the discovery of color, symmetry, and variety amongst other things to encourage and enhance the content our various academic subjects in our home classroom. I hope to share that same wonder and beauty God has placed all around us to encourage and enhance your student's academic exploration in my classroom.

Whether inside or outside our class will incorporate nature into our learning stations.

Some examples include using objects from nature as we:

- Learn and write sight words
- Draw and identify different types of natural objects
- Learn how to measure and work with rulers
- Work on our counting using tallies
- Make paint brushes and create art

We will also be doing an in depth study on Birds. Their life cycle, migration, nests and habitats.

Note: we will be going outside unless it is raining or too cold so PLEASE make sure your child has appropriate clothing for our adventures.
